

**Only**  
**eInstruction's CPS™ student response**  
**systems are compatible with ExamView®,**  
**even if others claim they're compatible too.**

**Because ExamView® is from eInstruction,** only eInstruction® student response systems are designed specifically to work with ExamView®. The CD of ExamView's student-response-ready question and test banks that you receive with your textbook seamlessly integrates with CPS™ with a single mouse click. Only eInstruction's CPS™ is designed specifically to instantly and flawlessly integrate with ExamView® 100% of the time, saving teachers tons of time during lesson preparation. This level of integration ensures that you won't lose any images, answers, publishers test banks, or data during assessment and grading.

**100% COMPATIBLE**

- No need to manually alter questions
- No lost or fuzzy images
- Reports the correct answer every time
- Seamless, automated integration

**At eInstruction, we take pride in ExamView®** and ensure that the integrity of the content and usability of dynamic questions and tracking meets the utmost standards. We expect nothing less when it comes to the integration of ExamView® and CPS™.

In order for anyone else's student response systems to work correctly with ExamView®, significant amounts of time must be spent to preload or change the answers, content, and reporting capabilities with each and every question. With eInstruction, ExamView® is immediately ready to use at its fullest potential so you spend less time preparing and more time teaching.

**Only eInstruction can promise the highest**  
**integrity of ExamView® content and integration.**

**Put us to the test. We'll prove it every time.**
